

MicroCraft is pleased to announce our continuing free Supply Chain Management webinar series Topics for 2014. This year we are adding a substantial number of **Case Studies** of real companies who are successfully using tools and techniques we helped them to define and implement.

I hope you'll have time to join us for one or more of these events. Remember, if for any reason you can't make the live webinar, you can still view the event via our YouTube archive. It's on our webinar page and covers all past recorded webinars.
